Braille Translation

You can only have back or forward translation on at once—not both

Forward   Plug in keyboard: command/fe/enter
Type; every 80 characters it will emboss. Empty buffer by pressing enter key twice on keyboard.
Basic Forward Translation: command/fb/enter
      Grade 1 only

Back   Command/bp/enter for printer
Connect dot matrix printer via parallel port
*Duxbury will emboss to the Mountbatten once set up as Generic/Text Only
